

Canadian Centre for Scholarship and the Christian Faith

TECHNOLOGY AND THEOLOGY

Friday-Saturday 3rd-4th May 2019

Technology is developing faster than our moral capacity to deal with it. Specifically Artificial Intelligence (AI) and Transhumanism raise questions about what it means to be human. What is consciousness? What is soul? What are life and death? Can technology really give us eternal life? Theology is in a unique position to handle these questions and issues.

The Canadian Centre for Scholarship and the Christian Faith at Concordia University of Edmonton cordially invites you to our eighth annual conference. The theme for 2019 is *Technology and Theology*. This conference is done in collaboration with the Machine Learning and AI Interdisciplinary Research Cluster of Concordia University of Edmonton.

The keynote speaker is Dr Craig Gay from Regent College in Vancouver BC. Dr Gay has published extensively in the area of Technology and Theology. The title of his keynote lecture is "Downsized: Modern Technology and the Diminishment of the Human". This lecture is open to the public and **FREE** on Friday 3rd May 2019 at 7pm, with reception to follow, in the Tegler. For more information you may talk with Bill Anderson here CUE or by email at bill.anderson@concordia.ab.ca.

Please register at <https://goo.gl/561nKf>. If you have a Professional Development Fund, just email ana.kuzyk@concordia.ab.ca and she will deduct the registration fee straight from you PDF.
