## **AHS POLICY: HIGH-ALERT MEDICATIONS**

AHS implemented the high alert medication policy (2017) in order to ensure the safety and minimize the potential for medication related errors involving high-alert medications. The policy must meet the requirements set by the Accreditation Canada Required Organizational Practices board and pre-existing safety standards that may influence the policy.

This poster focuses on AHS's High Alert medications policy and how it relates to Alberta's population health.
