**Bachelor
of Arts**
in Psychology

PSYCHOLOGY

Program Overview

3-year BA: This degree will provide you with an excellent general education as well as a solid background in the core areas of psychology. If you choose this undergraduate program, you're often planning to earn another degree or diploma in a related field such as law, education or business.

4-year BA: Our 4-year Psychology program allows you to study the discipline in greater depth. You'll have the opportunity to take additional senior-level courses, participate in more seminar-style classes, and also have the opportunity to pursue a major research project. If you're looking to gain admission to a graduate program (e.g. Master's, PhD), you'll need a 4-year degree and this is a great option.

4-year BA (Applied Emphasis): This 4-year degree program includes at least one full year field placement, which enables you to gain experience by working at a community agency or organization. The degree aims to provide you with the skills to be "market ready" for work in the human services field and also to be well prepared for graduate school. Many graduates of this program have continued their studies at the Master's or PhD level in programs such as psychology, family therapy, occupational therapy or health promotions.

Career Options

A Bachelor of Arts degree is one of the most flexible degrees available. You create your own career path when you tailor this program to focus on areas of personal interest. Some English degree career paths include:

Child and Youth Worker	Journalist
Addictions Worker	Media Coordinator
Psychologist	Teacher

Admission Requirements

Interested? You'll need to pre:
the following required high school courses:

- English Language Arts 30-1
- Three subjects from Groups A, B or C*
- One subject from Group A, B, C or D

* *Maximum of two subjects from Group B, each must be distinct.*

It is strongly recommended that applicants wishing to pursue a major, concentration, or minor in Psychology present either Math 30-1 or Math 30-2.

If you're interested in the Applied Emphasis program, you must apply for admission early in the second semester of your second year.

Interesting Courses

PSY 275 - Brain and Behaviour: An introduction to brain mechanisms involved in sensation, perception, movement, motivation, learning, and cognition, as studied in both humans and animals.

PSY 339 - Abnormal Psychology: The study of psychopathological disorders and their treatment. Topics covered include the major disorders as described in the DSM-IV. Psychotherapeutic techniques include psychodynamic, humanistic, and behavioural treatments.
