

Creating Exams in CUE Moodle

CTE supports the design of online moodle exams to be used on campus. We do not advocate nor have the ability to support online exams off campus.

Designing Exams:

Randomizing exams:

1. Create groups in moodle to ensure different exams for different groups.
2. Randomize questions
3. Randomize answers (cannot have "all of the above answers, but can have all of the other as answer)

Locking Down Moodle on Laptops during Exam

Our Moodle instance has a feature called Safe Exam Browser which can be used to lock out access to anything else on the computer the student is taking the exam on.

A video of its use is available here:

https://drive.google.com/file/d/1Mtw335JUaK_KHLNvLdSQgKGoh75D-Q9G/view
