

EDUCATIONAL EXPERIENCE IN THE BASQUE COUNTRY

**Speaker: Dr. Serg Ishutov, Assistant Professor,
Earth and Environmental Sciences**

Friday November 27, 2024

B217, Concordia University of Edmonton

Dr. Serg Ishutov recently traveled to San Sebastián, Spain, as part of his ERASMUS Mobility scholarship, where he visited the University of the Basque Country (UPV/EHU). During his trip, Dr. Ishutov engaged with university administration, faculty members from the Faculty of Engineering, and the International Office, fostering international collaboration. He presented to UPV students, faculty, and staff about Concordia University of Edmonton, showcasing our programs, Indigenous Student Centre, and student services. Dr. Ishutov also toured cutting-edge labs in 3D printing, earth sciences, and soil mechanics, and led a workshop on CAD modeling and 3D printing for UPV Engineering faculty. Looking ahead, he plans to collaborate on research exploring the use of 3D-printed models in teaching, strengthening the partnership between Concordia University and UPV/EHU.
