

The McNeil Centre for Applied Renewable Energy (CARE)

You are invited to the next webinar of the Renewable Energy Speaker Series hosted by the McNeil Centre for Applied Renewable Energy (CARE) at Concordia University of Edmonton (CUE)!

This speaker series provides us all an opportunity to explore renewable energy solutions, learn about the challenges faced by the sustainable energy sector (industry, government and society), careers in the renewable energy sector, and interact with experts from across Canada and beyond.

The Future is Electric presented by David Dodge

About the webinar: From green homes with heat pumps to EVs - the future is electric and pretty exciting. David will share stories of innovation, of the pace of change and all the ways in which this innovation will touch our lives and build a sustainable future with jobs.

About the Speaker, David Dodge: David Dodge is the producer of Green Energy Futures, a series of more than 400 documentaries on Canada's most inspiring clean energy and energy efficiency leaders, projects and technologies. The stories have appeared on the CKUA Radio Network, in magazines, at their YouTube Channel and at greenenergyfutures.ca web channel.

He has dedicated the last decade to researching energy, energy efficiency, green buildings and renewable energy topics and highlighting the most successful leaders, projects and business ventures that are part of billions of dollars in annual global investment in clean technology.

David is a sought-after speaker who has delivered more than 175 talks and keynote addresses. He is passionate about energy diversification and innovation that is providing economic opportunities and jobs in a sustainable future.

Thursday, November 20, 2025 from 10:00 – 11:00am MT
Google Meet Video call link: <https://meet.google.com/gme-oune-rvh>
